15-24 October 2024  
New Delhi, India

// Standards are taking centre stage in global governance discussions. When countries gather in New Delhi for WTSA-24, they will have an opportunity to foster digital inclusion and trust – values that are more important than ever to ensure that innovation in fields like artificial intelligence, the metaverse, and quantum information technologies helps us create the future we want."

**Doreen Bogdan-Martin**  
ITU Secretary-General

// Standards agreed by consensus create the confidence to continue innovating and investing. With every breakthrough in science and technology comes wider transformation, and we must keep coming together to develop the standards required for people and economies to thrive while pushing new frontiers. That's what our standardization processes are built for."
